

**1**

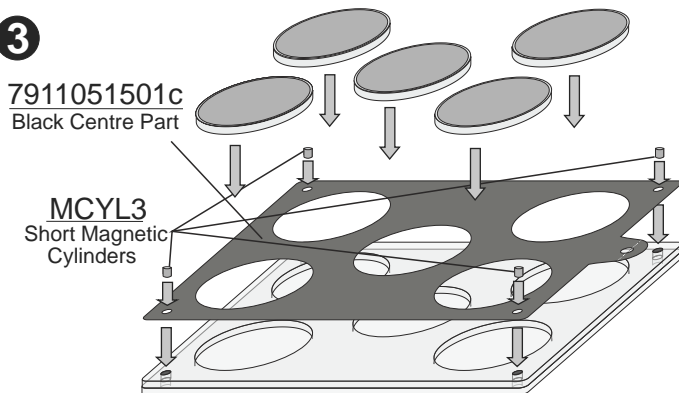

All acrylic parts are coated with a protective foil on BOTH sides. This foil has to be removed before the assembly. We suggest to have a microfiber cloth

**2**

Place the long magnetic pins on a flat surface with their shafts pointing up. Align them like the holes in the transparent front-/back panel. Now put the front-/back panel on top magnetic pins. Place the centre part on top as indicated.

**3**

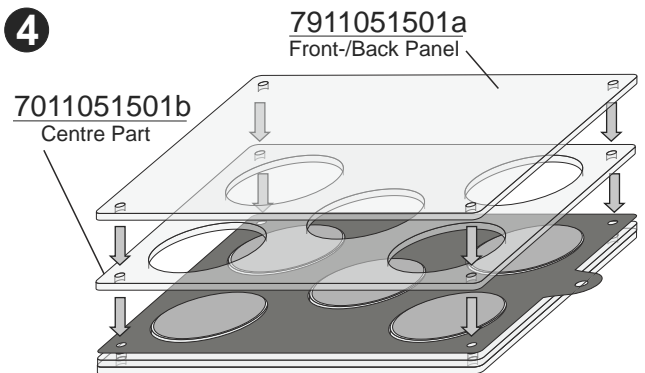

Now place the black centre part with the cut-outs on top of your transparent back-panel and centre panel.

Stick the small cylindrical magnets through the holes in the black centre panel. Check for magnetic polarity. Only one side of the cylinder magnet will be attracted to the magnetic pin below. The other side will be pushed away through the magnetic force.

Lastly, place your coin capsules inside the frame.

**4**

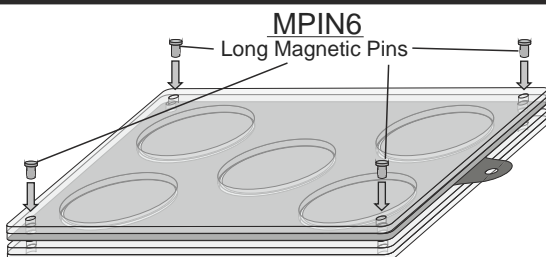

Place the front panel and the transparent centre of the assemble lower part of the case as indicated.

### **Cleaning instructions :**

Please do not use any cleaning agents other than water or special acrylic care products. Many other cleaning agents contain solvents, which can damage the acrylic glass.

**5**

Now there is only one thing left to do: Slot the 4 long magnetic pins through the holes in the front- and center panel. They will instantly snap to their magnetic counterparts.

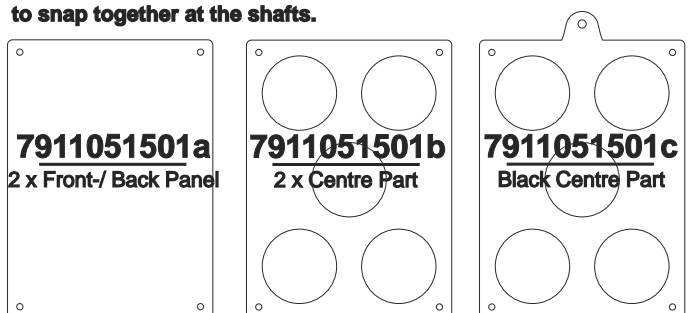

... and you are finished!

### **Individual Parts :**

**MPIN6** - 8 x Long Magnetic Pin 6mm shaft length

**MCYL3** - 4 x Short Magnetic Cylinder 3mm shaft length

**Long magnetic pins have inverse magnetic polarity to snap together at the shafts.**
